

## **SPECIFICATION AMENDMENTS**

The following paragraph replaces the prior version of the paragraph on page 11, lines 13-24 of the patent application as originally filed:

Beneath the main menu 402 are collections of titles that pertain to their particular entertainment areas and are currently available to the user. In this example, a user can navigate from the main menu 402 to a games collection 404 that lists currently available game titles. Navigation may also be made to a music collection 406 that groups available music titles and a movie collection 408 that groups available movie titles. Beneath each collection is the specific play area that pertains to the particular media experience. A games play area 410 is navigated through the games collection 404, a music play area 412 is accessed through the music collection 406, and a movies play area 414 is navigated through the movie collection 408 404. This model thus provides a high-level “filter” on the kinds of media available on the console, and what operations may be performed with respect to the media.
